VARIO-DELINEATOR CAP

for marking of curves with a tight radius and on dangerous tracks

The VARIO-Delineator cap serves the signalization (marking) in a variety of applications. Primary developed for marking of curves with a tight radius and on dangerous motorcycle tracks, the VARIO-Delineator cap also qualifies for flexible and fast marking of further danger zones or temporary road works such as mowing, traces of oil, etc. The VARIO-Delineator cap is characterized by little weight, fast and variable mounting on delineators as well by high visibility. Due to its

special design the VARIO-Delineator cap can be easily clipped on in just a few seconds and in different delay angles and rotation-locked. While developing, on the initiative and in close cooperation with the Department for Transport and Infrastructure of Baden-Württemberg, the main focus was little weight and rounded edges, to ensure no further danger for the road users in cases of an accident.

POSSIBLE OPERATION AREAS

■ Curve marking

- Tight adhesion of the foil Type RA2/C one-sided or both-sided

■ Attention

- Changing sign for quick mounting on the VARIO-Delineator cap
- Further signs like "Mowing" can be mounted in addition

■ Speed limit

- Changing sign for quick mounting on the VARIO-Delineator cap
- Further signs like "Oil on road" can be mounted in addition
